

Requirement Number	Description	Contributor Name
1	Implement a sign-up and sign-in feature for drivers and passengers.	Konstantinos Baktalias
2	Passengers should be able to enter the start and end destinations (for example, Eindhoven to Delft) in the main interface.	Kimon Kyparos
3	Once the start and the destination places are entered, the system needs to show the path on Google Maps.	Kimon Kyparos
4	Once the passenger clicks on the search button, the website will look for all trips going from Eindhoven to Delft (for all trips going from any location within 10 KM radius from Eindhoven to any location within a 10-mile radius from Delft).	Konstantinos Baktalias
